

Paradas

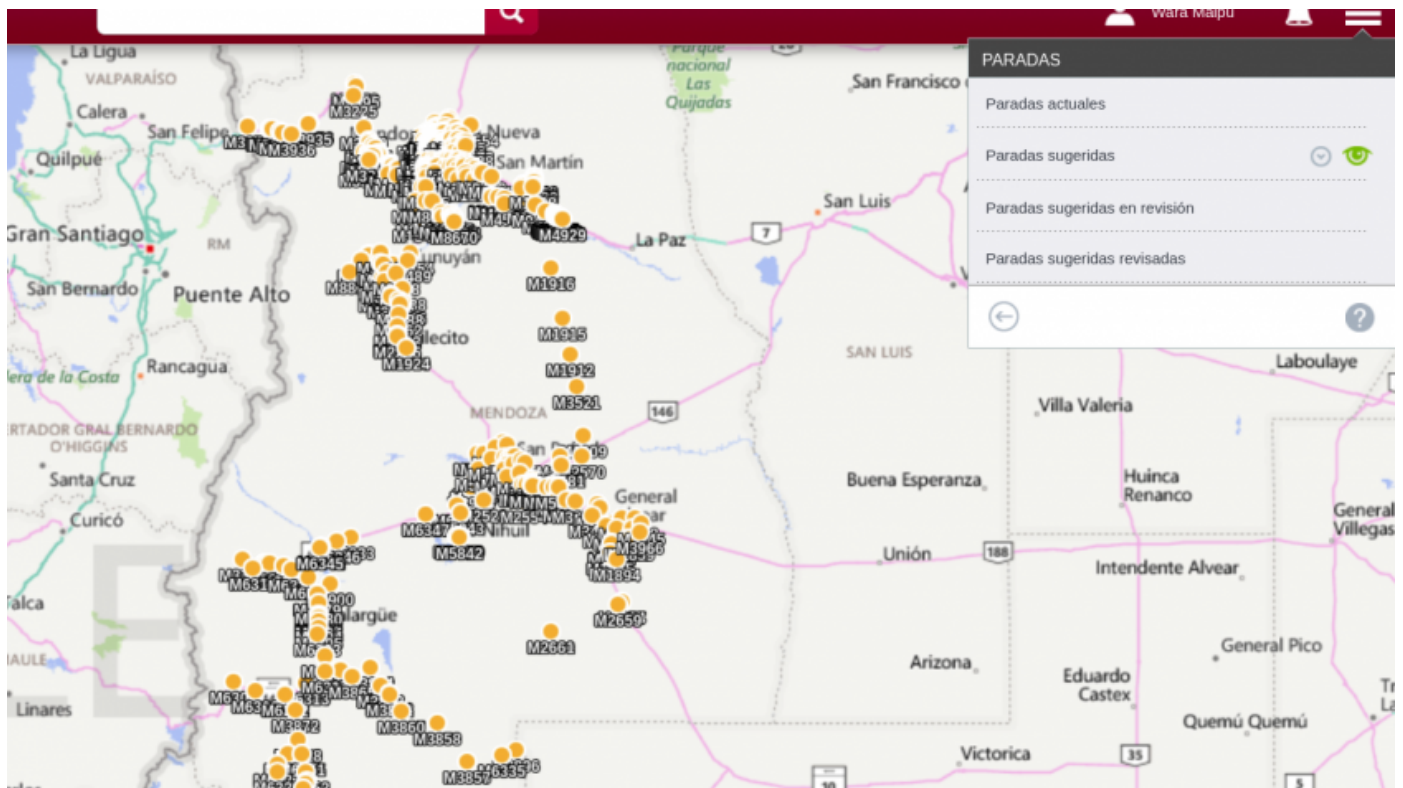

En el Menú principal encontramos el icono de PARADAS, estas se conciben desde paradas Sugeridas, luego pasan a paradas en Revisión y al aprobarse se convierten en Paradas, las cuales son marcadas en el mapa con puntos amarillos.

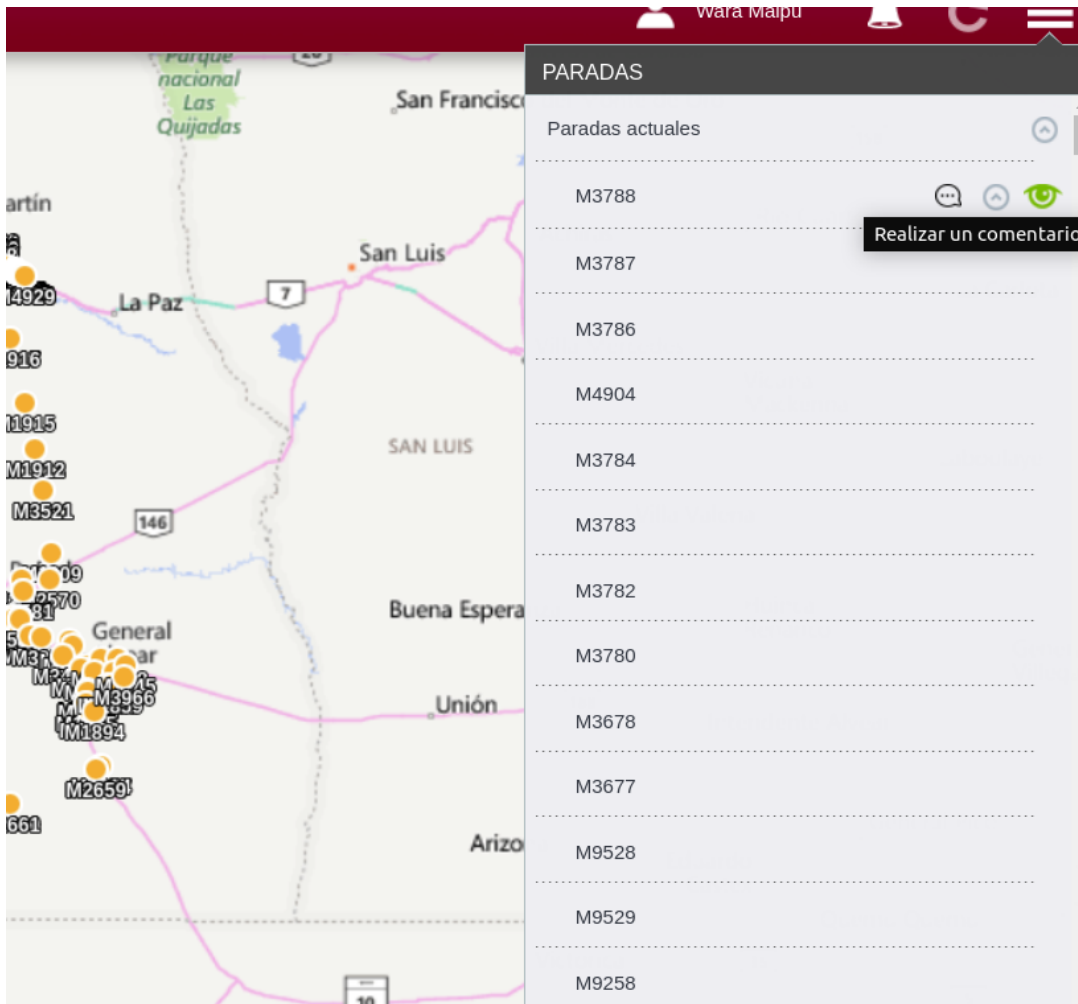

Cuando tocamos el icono de PARADAS, se despliega este cuadro donde encontramos:

- PARADAS ACTUALES
- PARADAS SUGERIDAS
- PARADAS SUGERIDAS EN REVISIÓN
- PARADAS SUGERIDAS REVISADAS

Cuando tocamos alguna de estas, se despliega su contenido. notar que las paradas actuales son exportables a excel y kmz.

En Paradas Actuales, al desplegar la grilla o listado vemos que tienen a la derecha los símbolos de un comentario, al tocar este icono desplegamos un cuadro en la pantalla para poder hacer alguna aclaración de la parada, la flecha así arriba para desplegar alguna información que posea la parada, y el ojo en verde que significa que esta parada es visible en el mapa, si lo presionamos y el ojo queda en gris, la parada desaparece del mapa.

Cuando presionamos en Paradas Sugeridas, se despliega el lugar donde aparece un botón que nos propone Sugerir Parada, al presionarlo aparece la siguiente acción:

- COORDENADAS, donde nos pide Latitud y Longitud, en caso de no saberlas, presionamos las letras azules de *MARCAR EN EL MAPA* que nos permiten señalar el lugar y solo se completan las coordenadas.
- Luego tenemos un cuadro para dejar escrito algún *COMENTARIO* por la sugerencia que hacemos.
